

Sweetser Storm Water Board

Meeting Minutes

April 11, 2013

Sweetser Storm Water Board meeting was called to order at 6:00 pm.

Members present: Rich, Carl and Chuck

Meeting minutes for March were not available and will be reviewed during the meeting in May.

The county had several inches of rain the two days leading up to this meeting. Rich, Carl and Chuck took a drive through town to identify problem areas we may have with the town's storm water drainage. Some of those problem areas are as follows:

-Davis Street: the field from the grain mill that is south of Davis and East of Meridian slopes towards the homes on Davis and flooded the back yards up the houses.

-South of Hwy 18 and Osborn, drainage was stopped due to a couple of driveways that needed their culverts cleaned out.

-North of Mary Lou Street was a large area of pooled water. It appeared that if the area were trenched it would provide drainage to the field North. However, it also appears that this is private property and not belonging to the Town.

-Several driveway culverts need cleaned out to allow drainage to continue.

-High water was also observed on the South side of Eagle Estates near one of the sewer manholes.

Adjournment at 6:50pm
